Although every effort has been made to ensure the quality of the data, the NSW Roads and Traffic Authority cannot guarantee the accuracy of the data and does not accept responsibility for any consequences arising from its use.

Maps were prepared by Spatial Information Systems Unit, RTA. The base maps were supplied by Sensis Pty Ltd. 2002.

2003 SOUTHERN REGION CONTENTS

Part 1. AADTs on Classified Roads ordered by Road Number9

Part 2. AADTs on Town and City Streets ordered alphabetically by Town Name.....27

Part 3. AADTs on Unclassified Roads ordered by Local Government Area (LGA).....37

**Part 4. Daily Distribution of Traffic Volumes ordered by Station Number
(permanent stations only)43**

**Part 5. Hourly Distribution of Traffic Volumes ordered by Station Number
(permanent stations only)151**

Part 6. Traffic Volume Location Maps.....207

This page has been intentionally left blank

EXPLANATORY NOTES

1.0 INTRODUCTION

This book incorporates the results of a traffic survey undertaken during **2003** in RTA Southern Region as part of a three year repeating cycle covering the whole of the State of NSW and is comprised of six parts.

AADT is the Annual Average Daily Traffic assessed as the total volume of traffic recorded at a specific road location (known as a traffic station) taken over a calendar year and is divided by the number of days in that year.

The RTA Southern Region Traffic Volume Data book is comprised of six parts:

- Part 1. AADTs on Classified Roads ordered by Road Number
- Part 2. AADTs on Town and City Streets ordered alphabetically by Town Name
- Part 3. AADTs on Unclassified Roads ordered by Local Government Area (LGA)
- Part 4. Daily Distribution of Traffic Volumes ordered by Station Number (for permanent stations only)
- Part 5. Hourly Distribution of Traffic Volumes ordered by Station Number (for permanent stations only)
- Part 6. Traffic Volume Location Maps

2.0 STRUCTURE OF THE PUBLICATION

Part 1 lists the stations and their AADT by combined directions in ascending order of Classified Road number and sequence along each road.

Part 2 lists the stations and their AADT by combined directions grouped in alphabetical order by town and city name.

Part 3 lists the stations and their AADT by combined directions on unclassified country roads in alphabetical order of Local Government Area (LGA) name.

Part 4 lists the daily distribution of traffic volumes of permanent stations by day of week and week of year in order of station number.

Summary statistics presented at the foot of the **Daily Traffic Volume** table are:

- Annual average by day of week and weekly totals
- **AADT** (Annual Average Daily Traffic)
- **AAWT** (Annual Average Weekday Traffic)
- **AAWE** (Annual Average WeekEnd Traffic)
- **AAPH** (Annual Average Public Holiday Traffic)

Part 5 lists the hourly distribution of traffic volume for a single week at each permanent station by hour of day and day of week for each direction of traffic flow. The listing includes total, average, and percentage of hourly traffic volumes for weekdays, weekends, and whole of week for each corresponding hour.

Single weeks of hourly distribution were selected to exclude public holidays and other abnormal influences where possible. Nevertheless hourly distributions may not be representative of annual average hourly traffic patterns.

Summary statistics presented at the foot of the **Hourly Traffic Volume** table are:

- Daily, weekday, weekend and weekly totals
- **MAX** (Maximum hourly flows)
- **AWT** (Average Weekday Traffic)
- **AWE** (Average Weekend Traffic)
- **ADT** (Average Daily Traffic)

Part 6 lists the LGAs, traffic station status and attributes and maps of the survey area as follows:-

- Regional Map Scales
- Wollongong UBD Equivalence Table
- List of LGAs
- State Map Index
- Regional Legend
- Regional Map Index
- Regional Maps
- Wollongong Map Index
- Wollongong Legend
- Wollongong Maps
- List of Town Maps
- Town Maps

Each regional map and town map displays the station locations, permanent status (if applicable) and year 2003 AADT value if available.

3.0 STATION TYPES & AADT DEFINITIONS

Traffic survey sites are either designated as **sample (short survey duration)** stations or as **permanent (continuous survey duration)** stations. The **AADT type** is represented during a 24-hour period averaged over a year as the number of:

- **Axle pair** passes or
- **Vehicle** passes

For example, with axle pair passes, a typical car is represented by one axle pair, a three axle truck by one and a half axle pairs and a six axle semi trailer as three axle pairs.

It should be understood that AADTs measured by counting vehicles is not equivalent to AADTs measured by axle pair passes.

AADT is measured by axle pairs at urban and rural sample stations, most rural permanent stations and a few urban permanent stations.

AADT values in parts 1, 2 and 3 are for combined directions. Daily and Hourly traffic counts in parts 4 and 5 are indicated by a suffix to the station number:

Eg

N	=	Northbound
S	=	Southbound
E	=	Eastbound
W	=	Westbound
C	=	Combined directions (Non directional)

4.0 MAP SYMBOLS EMPLOYED FOR TRAFFIC STATION LOCATIONS AND ASSOCIATED AADTS

- (a) Traffic counting sites are indicated on the maps by a red dot, with a joining line to the **station number** above and **associated AADT value** below.
- (b) **Counting sites surveyed in 1997 or 2000, but not surveyed in 2003 are indicated on the maps without their AADT values. Sites surveyed prior to 1997 and are in the listing in the current book, but not surveyed since, are indicated on the maps by a red dot only.**

5.0 SYMBOLS FOR TRAFFIC STATIONS STATUS & ATTRIBUTES

The symbol (V) for AADT as vehicle counts and the symbol (*) for AADT as axle pairs are used **EXCLUSIVELY TO INDICATE PERMANENT STATIONS**.

The symbol (V) or the symbol (*) is affixed directly to AADT values in parts 1, 2 and 3 (only) to indicate the years and types of permanent station status and to indicate the survey years when a station changed between sample and permanent status.

The symbol (V) for vehicle counts or the symbol (*) for axle pairs is **ALSO** affixed to station number in parts 1, 2, 3 and 6 {the symbol star (♠) for maps} where a station is permanent for **AT LEAST THE 2003 SURVEY YEAR**. **On maps these star symbols are located next to the station site numbers**. No symbols are displayed in parts 4 and 5.

The symbol (V) or symbol (*) is affixed to station number **ONLY (Not to the associated AADT values)**, where the station had permanent status for all survey years as presented in parts 1, 2 and 3.

Eg

STATION	LOCATION	MAP	Km	1986 AADT	1988 AADT	1990 AADT	1992 AADT	1994 AADT	1997 AADT	2000 AADT
V07.053	FALLS CREEK-N OF MR312,HUSKISSON RD	55	172.1	10163*	11467*	12868*	13629*	14481V	15721V	16664V
07.802	TOMERONG-N-BRAIDWOOD RD @TOMERONG CK	55	180.0	--	--	--	--	--	--	9799
07.368	ULLADULLA-AT MILLARDS CK BR	55	226.2	11023	--	11892	--	10993	13586	13472
V07.063	BURRILL LAKE-1.5KM S OF BR	55	232.6	3997	4227	4580	4812	5005	5240	5804

This "" indicates that this station is **Permanent** in the current count year (2000), counting **axle pairs**. Furthermore, since the status of this site has remained constant over the years shown in the Table, the individual traffic volume numbers are **not** individually tagged to indicate the method of data collection.*

*This was a permanent site in 1986 to 1992 counting **axle pairs**. From 1994, it is still a permanent site but counting **vehicles**.*

*This was a sample site in 1978-1982 counting **axle pairs**. In 1986-2000 it was a permanent site counting **axle pairs**.*

STATION	LOCATION	MAP	Km	1978 AADT	1982 AADT	1986 AADT	1990 AADT	1994 AADT	1997 AADT	2000 AADT
